Remanufacture**

PSI supports your Vestas V27 component repair needs

PSI Repair Services is the world's largest independent component repair company for electronics, hydraulics, robotics and precision mechanical assemblies. Our repairs save customers up to 70% versus the cost of buying new components from the OEM. All wind energy component repairs come with a **free evaluation** and **performance test**. For optimal peace-of-mind, PSI offers the most comprehensive **engineering services** in the industry, featuring state-of-the-art diagnostic equipment, such as the **Cotas 4400 Series Test System**, which provides powerful failure analysis, that can be used to make more informed maintenance decisions. In many cases, PSI's engineering team can enhance the performance of a faulty OEM component with superior, more efficient technology to further extend the component's life. For unsalvageable and obsolete components, PSI offers component remanufacturing services that are second to none. In addition, PSI offers emergency services for customers that need to get their critical systems back up and running again as quickly as possible.

Components we repair include:

| | | | | | |
|-------|--------|----------------------------|---------|----------------|-----------------------|
| Cotas | CT1118 | Digital Output | Cotas | CT2128 | A/D Converter |
| Cotas | CT1124 | Power Supply External | Cotas | CT2129 | A/D Converter |
| Cotas | CT1133 | Digital Input | Cotas | CT2132 | Triggering Thristor |
| Cotas | CT1153 | Digital Output | Cotas | CT218 | Operator Panel |
| Cotas | CT206 | Measure Box | Cotas | CT3305 | Power Supply Internal |
| Cotas | CT207 | Operator Panel | Cotas | CT4401 | Processor |
| Cotas | CT2112 | Communication Module | Cotas | CT4402 | Processor |
| Cotas | CT2115 | RS422 Serial Communication | Cotas | CT4493-9 | Rack |
| Cotas | CT2120 | D/A Converter | Vickers | EEA PAM Series | Power Amplifier |

PSI also repairs Baluff transducers, yaw and pitch motors, proportional valves, and light-duty gearboxes.

PSI's functional test system simulates down-tower and up-tower communication and component interface. PSI can also identify and correct "watch dog" errors.
